

The FCC should help protect the freedoms that our fore-fathers created, and all of our fallen soldiers have defended. Public airwaves should be unbiased. Failing that, equal time to all sides should be given, if the executives at a communications company choose to air biased information.

As a citizen, a voter, and a tax payer, I urge your organization to monitor and regulate the actions of a company, such as Sinclair Broadcast Group, to ensure that fair treatment is given to both sides.

Thank you,

Robert Ley
